Net area (m ²)	12,761
Total no. of exhibitors	456
No. of countries represented	19

Cost of indoor space/row stand, 2020 (EUR/m ²)	€170.00
Frequency	every two years
Date of next event	22–25 February 2022

Brief description

Innovation is the brand essence of bautec. Whenever there's something new in construction and building technology, it can be found at this trade event. **Training** is the future foundation for all participating sectors. That's why supporting and training qualified young talent is a main focus at bautec. **Efficiency** is a key topic for the future. Bautec shows how this challenge creates new business opportunities.

Construction and building technology are among the world's most innovative industries. New product ideas are developed almost daily in the key areas of digitalization and energy efficiency. And bautec 2020 is where these concepts are presented. Bautec not only showcases innovative products and solutions – the trade fair itself is packed with innovations. Featuring a full range of new formats, bautec is at the cutting edge and will continue to strengthen its position as the industry's most important meeting place in 2020. Special events include the **bautec.INNOVATION AWARD**, **bautec Congress**, **Real Estate Industry Day** and **SHK Practice Day**.

The professional character of bautec has become firmly established in recent years with a trade visitor share of 87%. The share of trade visitors from business sectors including construction/finishing (42%), planning/architecture (23%) and real estate and housing (8%) underscore the importance of bautec as a **trade fair for craftsmen and decision-makers**. In addition to building materials and construction systems, bautec 2020 features a variety of **future-focused topics**: cost-effective and sustainable housing, energy-efficient construction, noise and fire protection, sanitary/heating and building technology as well as building and living with wood and renewable raw materials.

Bautec is not only a major attraction for industry professionals. It is also a source of inspiration for young people in grades 7 to 13, vocational school apprentices, and college students. Anyone interested in **developing their skills and qualifications** in the construction or building technology sectors will find everything they need at bautec 2020. Focusing on the **future@bautec** theme, the **Construction CareerCenter** offers a diversified daily program highlighting the versatility of the industry and its opportunities.

As part of the bautec framework, **GRÜNBAU BERLIN** drives the discussion about the **Green City** of the future. This is where exhibitors specializing in gardening, landscaping, playground and sports field construction showcase their products and services on 3,000 square meters of display space – from outdoor furniture and building materials, to roof greening, climbing equipment and pond construction.

Bautec offers visitors a full range of building construction elements with all industry segments represented in a single trade fair – an integrated network uniting building envelope and building technology.
